Москва, 2012

Если соперники равны по силе и не допускают серьёзных промахов, то дело почти всегда сводится к эндшпилю.

Здесь же победа чаще всего приходит к более опытному и знающему. Не любят молодые шахматисты играть скучные, на их взгляд, позиции. Миллионы хорошо начатых ими партий были загублены в один ход в равной, а то и в лучшей позиции; ещё больше партий было не выиграно, хотя перевес был достаточный для победы. Дело доходит до того, что юные дарования панически боятся окончаний, будучи уверенными, что обязательно их проиграют.

Вот поэтому в последнем, 4-м «Решёбнике» мы постарались помочь юному спортсмену. Авторы собрали в нём основные типовые позиции, которые необходимо знать, как таблицу умножения. А чтобы было не скучно, добавили интересные примеры из партий чемпионов и невероятные этюды знаменитых шахматных композиторов.

Кстати, все чемпионы мира уверены в необходимости изучать окончания. В. Смыслов советует молодым шахматистам уделять эндшпилю большое и серьёзное внимание.

Х.Р. Капабланка считает, что умение разыгрывать конец является необходимым условием практического успеха.

А «дедушка русских шахмат» А. Петров утверждает, что уметь играть конец — значит, уметь играть. Мы точно уверены, что, прорешав до конца 4-й «Решёбник», вы полюбите простые позиции. И тогда построить «мост», «квадрат» и «лесенку» на шахматной доске вам не составит никакого труда. Кстати, в конце партии все изученные вами тактические приёмы обязательно встретятся.

### **Задачи и комбинации в книге классифицированы по трём уровням сложности**

«кадетский»

2-й разряд  
(рейтинг 1700–1800)

«офицерский»

1-й разряд  
(рейтинг 1800–1900)

«королевский»

1-й разряд и КМС  
(рейтинг 1900–2100)

**СИМВОЛ и ЦВЕТ** фигуры рядом с диаграммой показывают уровень сложности и «чей ход» в позиции. Например:

– ход белых, «кадетский» уровень;

– ход чёрных, «офицерский» уровень.

Под каждой диаграммой мы оставили свободное место, для того чтобы вы могли записать решение (как в «Рабочей тетради»).

#### **Позиции распределены по следующим темам**

	<b>№№</b>	<b>страницы</b>
<b>Пешечные окончания</b>	1–96	8–23
<b>Ладейные окончания</b>	97–204	24–41
<b>Слоновые окончания</b>	205–300	42–57
<b>Ферзовые окончания</b>	301–348	58–65

If the players are of equal strength and do not make any serious mistakes, things are nearly always decided in the endgame. In this case it is usually the more experienced and knowledgeable player who wins. Young players tend to dislike playing boring (in their opinion) positions. Millions of well-begun games have been lost in one move, from an equal or even better position. Even more games have not been won, although the advantage was quite sufficient for a win. It even reaches the stage that talented young players are often terribly afraid of endings, being quite sure that they will definitely lose.

This is the reason why in this last, 4th book we have tried to help the young competitor. The authors have gathered here the basic typical positions, which have to be known like the multiplication tables. And to make it more entertaining, they have included interesting examples from the games of the champions and incredible studies by famous chess composers.

Incidentally, all the world champions have been convinced of the need to study endings. Vasily Smyslov recommends that young players should pay very serious attention to the endgame. José Raúl Capablanca thinks that the ability to play endings is an indispensable condition for practical success. And the ‘grandfather of Russian chess’ Alexander Petroff states that knowing how to play endings means knowing how to play.

We are quite sure that, when you have solved all the tests in this 4th book of the ‘Tactical Chess Exercises’ series, you will come to like simple positions. And then it will be no problem for you to build ‘bridge’, a ‘square’ or a ‘staircase’ on the board. Incidentally, in the endgame you will encounter all the tactical devices that you will have learnt.

### **The tests and combinations in the book are divided into three levels of difficulty:**

	‘cadet’	–	(rating 1700–1800)
	‘officer’	–	(rating 1800–1900)
	‘king’	–	(rating 1900–2100)

The **SYMBOL** and the **COLOUR** of the piece next to a diagram indicate the level of difficulty and whose turn it is to move. For example:

-  – **White to move, ‘cadet’ level**  
 – **Black to move, ‘officer’ level**

We have left some blank space under each diagram for you to write down your solution, as in a workbook.

*1. ♖c8 ♘:e3 2. ♖:d8+*

You can check your solutions against the answers, which are given in the middle of the book, but you should resort to this only in an emergency!

**The positions are arranged according to the following topics:**

	<b>№№</b>	<b>страницы</b>
<b>Pawn endings</b>	1–96	8–23
<b>Rook endings</b>	97–204	24–41
<b>Bishop endings</b>	205–300	42–57
<b>Queen endings</b>	301–348	58–65
<b>Knight endings</b>	349–420	66–77
<b>Transition into the endgame</b>	421–504	78–91

Wenn die Partner gleicher Starke sind und keine groben Fehler machen, läuft es fast immer auf ein Endspiel hinaus. Den Sieg erreicht oft der Erfahrenere und Sachkundigere. Junge Schachspieler mögen es nicht, aus ihrer Sicht langweilige Positionen zu spielen. Millionen gut eröffneter Partien wurden mit einem Zug in gleich starker oder sogar besserer Stellung verspielt. Nicht wenige Partien enden im Patt, obwohl es für einen Sieg gereicht hätte. Es kommt daher, dass junge Talente panische Angst vor dem Endspiel haben, weil sie sicher sind, dass sie unbedingt verlieren.

Deswegen wollen wir im folgenden vierten Lösungsbuch dem jungen Sportler Hilfestellung geben. Die Autoren haben darin typische Grundpositionen gesammelt, die man ebenso gut kennen muss wie das Einmaleins. Und damit man sich nicht langweilt, zeigen wir interessante Beispiele aus Meisterpartien und unglaubliche Lehrstücke berühmter Schachkomponisten.

Übrigens sind alle Weltmeister von der Unvermeidlichkeit überzeugt, das Endspiel zu lernen. Wassili Smyslow empfahl jungen Schachspielern immer, dem Endspiel eine große und ernsthafte Aufmerksamkeit zu widmen.

J. R. Capablanca meint, dass die Fähigkeit, das Endspiel zu führen eine unumgängliche Bedingung des praktischen Erfolges ist. Und der «Großvater des russischen Schachs» A. Petrow behauptet, dass das Endspiel können heißt, spielen zu können. Wir sind davon überzeugt, dass Sie, nachdem Sie alle Lösungen dieses Buches gefunden haben, die einfachen Positionen liebgewonnen haben. Dann wird es ihnen leicht fallen, auf einem Schachbrett eine «Brücke», ein «Quadrat», und eine «Treppe» zu errichten. Übrigens werden am Ende der Partien alle erlernten taktischen Kunstgriffe immer wieder vorkommen.

### **Die Aufgaben und Kombinationen sind in drei Stufen eingeteilt:**

	«Kadetten»	–	mit Elo 1700-1800
	«Offiziere»	–	mit Elo 1800-1900
	«Könige»	–	mit Elo 1900-2100

Das Symbol und die Farbe der Figur neben dem Diagramm zeigen den Zug von Weiß oder Schwarz mit ihrem Schwierigkeitsgrad.

– **Weiß am Zug, «Kadetten»;**

– **Schwarz am Zug, «Offiziere».**

Unter jedem Diagramm haben wir Platz gelassen, damit Sie Ihre Lösung wie in einem Arbeitsheft aufschreiben können.

### **1. Tc8 S:e3 2. T:d8+.**

Man kann seine eigenen Lösungen nachher mit Hilfe der in der Mitte des Buches angeführten Ideallösungen überprüfen. Aber es ist besser, zunächst alles selbst auszuprobieren.

### **Die Stellungen sind nach Themen geordnet**

**Костров В., Белявский Б.**

**К72** 2000 шахматных задач. 1-2 разряд. Часть 4. Шахматные окончания. — М.: «RUSSIAN CHESS HOUSE», 2012. — 112 с.

ISBN 978-5-94693-187-8

В последнем, 4-м «Решбнике» мы собрали основные типовые позиции шахматных окончаний, которые необходимо знать, как таблицу умножения. А чтобы было не скучно, добавили интересные примеры из партий чемпионов и удивительные этюды знаменитых шахматных композиторов. В эндшпиле победа чаще всего приходит к более опытному и знающему. Все чемпионы мира не раз подчеркивали необходимость изучать окончания. В. Смыслов советует молодым шахматистам уделять эндшпилю особое внимание. Х.Р. Капабланка считает, что умение разыгрывать окончание является необходимым условием практического успеха. А «дедушка русских шахмат» А. Петров утверждает, что уметь играть эндшпиль — значит, уметь играть.

Мы не сомневаемся, что, решив все задания из настоящей книги, вы полюбите простые позиции. И тогда построить шахматные «мост», «квадрат» и «лесенку» не составит для вас никакого труда. А в нужный момент — сумеете загнать противника в пугиванг. В конце партии вам обязательно встретятся все изученные в первых трех книгах тактические приемы.
